## DESIGNED TO BE WORN OVER PRESCRIPTION EYEWEAR

The Cocoons collection features unique design elements not found in any other fitover sunglasses. Designed to fit comfortably and securely over 99.5% of all prescription eyewear frames, the patented OveRx designs are engineered to deliver unparalleled protection from damaging UV light and harsh glare. Integrated brow and underside protection eliminate reflected light from above and below. Injected polycarbonate side shields block peripheral light without compromising the wearer's range of vision. The result is a collection of frame styles that deliver 40% more protection than conventional sunglasses.
