

Loop Q Large Arbor Fly Reels – Details

LOOP Q REEL

Optimised performance meets cutting edge engineering

This excellent new range of Loop Q Fly Reels are the direct result of a two year project to develop a performance LOOP fly reel at a highly competitive price point. Finished in dark gunmetal grey, and featuring Loop's iconic L shaped badge of honour on the robust die-cast reel housing, each reel benefits from a powerful braking system perfectly suited for the pursuit of multiple species.

The Q's lightweight spool is machine engineered and features a V shaped arbour design to improve line retrieval during operation. In addition to this highly effective line management, all Q reels feature a unique embedded counterbalance, enhancing rotational efficiency, and streamlining the fly reel profile.

The spool is quickly and efficiently secured and removed by a cleverly integrated screw cap, resulting in no loose component parts that could easily be misplaced. The attached cap allows for effortless spool changing when a change of line required. In summary, the four models in the Q series offer performance fly reel solutions for the most demanding fly fishing environments.

PRINCIPAL FEATURES

- Embedded counter balance on spool
- Machined V shaped spool for optimal line retrieval
- Ergonomic winding handle
- Sealed powerful drag system
- Large clutch knob for precise drag adjustment
- Integrated spool screw cap
- Two part spool and housing - no loose components

The New Loop "Q" Fly Reels are available in four sizes

MODELS	ITEM NO.	CAP. YD/LB	ARBOR DIA.	OUTER DIA.	INNER WIDTH.	WEIGHT
4/6	QR46-*	WF5+70/20		91mm	24mm	164g
6/8	QR68-*	WF6+100/20		98mm	26mm	188g
7/9	QR79-*	WF7+130/30		105mm	30mm	226g
8/11	QR811-*	WF10+150/30		113mm	33mm	267g
